Professional Experience

AI Research Intern

03/2025 – 06/2025

WNS-Vuram

- Researched AI agent protocols like Google's A2A and Agent Development Kit.
- Developed a multi-agent project management system inspired by JIRA using MCP for AI-tool interaction.
- Authored a white paper on Google's A2A protocol (pending publication), explaining how intelligent agents communicate, collaborate, and scale in real-world AI systems.

Achievements

Myntra HackerRamp Hackathon- 2024 [🔗](#)

- **Advanced to Phase 3** in the **Myntra Hackathon 2024**
- Demonstrating strong skills in **React Native** development with swipeable cards, animated icons, smooth transitions, and dynamic content rendering using Swiper for enhanced UI responsiveness and navigation speed.
- UI/UX design, and problem-solving under pressure.

Projects

MERN-AI-Chatbot [🔗](#)

MongoDB, Express.js, React.js, Node.js, API, JWT Authentication, HTTP-only Cookies, Signed Cookies, Middleware Chains, REST APIs, Postman, Git, GitHub.

- Developed an **AI-powered chatbot** using the **MERN stack** with real-time messaging.
- Integrated **OpenAI API** for intelligent responses, reducing response time with optimized queries.

PixPDF [🔗](#)

Python, Fastapi, PyMuPDF, Uvicorn

- Upload a PDF and detect pages containing images with their bounding boxes and positional labels.
- Annotate the PDF by drawing boxes and labels around detected images using the JSON data from Service 1.
- Generate a Base64-encoded version of the annotated PDF for download or preview.

Internal tool Projects

- **Lost-and-found:** Built Lost and Found SST, a full-stack app with secure authentication, RESTful APIs, and a responsive UI for efficient item reporting and claiming. [🔗](#)
- **Fee-Adjustment-Transparency:** Developed a fee-adjustment transparency tool with dynamic data handling and responsive UI to present clear, actionable cost insights. [🔗](#)

Open Source Contributions

Apache / Gravitino [🔗](#)

- Enhancing the overall performance and stability of the platform.

Internetarchive / openlibrary [🔗](#)

- Improved overall **search performance** and **user experience** by optimizing query handling and refining search algorithms.
